

Weekly Report

12/28/2015 – 1/03/2016

Li Zongzhuang

Summary

This week I also worked with Lu Junhua's task with netease. To catch the weibo, I learned Phantomjs but something wrong happened in contribution building. So I change to python. I learned java as well. In Saturday, I helped Lu Junhua with checking the paper. I found the problem that I have on schedule.

To do List

Next week, I'll learn the python and java, and still work on the netease program. I'll make a good schedule to manage my time.
